Camera

Audio Line Output

Remote Controller

only when you enter video or iPod menu, the controller will work.

- *Charge -- charge iPhone & iPad
- *Pause/Play --- only work when playing the video/music
- *Previous/Next --- choose movies / songs on the list
- *Fast Rewind/ Forward --- long press to rewind or forward. short press to last/next song, or back to start when playing video
- *Menu --- back to video or iPod menu
- *Enter --- start to play video or music
- *Replay --- only when playing music

Operate Notes

*Audio Line Output, when you watch HD movies, this interface will not work, the audio and video transmitted to HD TV with the same cable. in this case, you have to connect speaker on your HD TV.

*The USB interface, the HDMI interface, and the Audio Line interface can't work synchro, you have to use it separately.

*when you put iPhone/iPad on the Dock, the default mode is to play music.

*USB interface
only work for iPad/ iPad2
download photos and videos from your digital camera. can connect with digital camera or iPhone4

*Charging
Charge with APPLE original power adapter, the red LED will light.
it not charge automatically. you need press the charge button manually, or use remote controller.
when you connect 30pin interface with PC, it can only charge iPhone4.

Everytime lift the bracket, please push it down to the slot to make the bracket fix firmly, or it will not support iPad/iPad2 stably.
